NICKNAME

OPERATIONS

122 Medical Group: Federalized ANG on 10 February 1951 at Baer Field, IN, and assigned to 122 Fighter-Interceptor Wing; inactivated 7 February 1952.

In January, 2007, more than 20 members of the 122 Fighter Wing Medical Group deployed from Fort Wayne International Airport to Baghdad International Airport in support of the first ANG Emergency Medical Squadron.

While there, they treated over 4,000 patients and provided instructors for the first-ever Iraqi Aerospace Medical Class. The group was also the first EMEDS in a war zone to implement the MC4 patient tracking system (US ARMY version) in place of the GEMS (USAF version) improving patient tracking and virtually eliminating system crashes.

In February 2010 the 122 Medical Group excelled in a health inspection and received an outstanding rating and a score of 94 percent. The inspection team looked at aerospace medicine, dental, credentialing, medical readiness and training, and many others. In total the team inspected more than 100 different elements. This is the medical group's second consecutive outstanding rating.
