OPERATIONS

The 145th Civil Engineering Flight, NCANG, was designated and activated at Douglas

Municipal Airport, Charlotte, NC effective 22 November 1969. Authorized strength: 4 officers and 81 airmen. The 145 CEF was assigned to the 145th Military Airlift Group, NCA and attached to the 145th Support Squadron, NCANG, for administrative and logistical support. The 145 CEF was a new unit for the 145th Military Airlift Group.

Following subordinate units of the 145th Airlift Group, NCANG, were redesignated as shown below, with no change in station, strength or gaining command (Air Combat Command), effective 1 March 1994.

145th Civil Engineering Squadron

145th Civil Engineer Squadron

In March, members of the North Carolina Air National Guard's 145th Civil Engineer Squadron have been hosting civil engineers from Total Force units in Missouri, Oklahoma, and South Carolina for a mission essential equipment training course at the North Carolina ANG regional training site in New London. The class is geared toward training civil engineers to use specialized mission-essential equipment typically used in wartime or contingency scenarios, according to a March 22 New London release. Such gear includes electrical airfield lighting systems, mobile aircraft arresting systems, and water purification units, states the release. Airmen in the civil engineering career field must re-certify every 24 months by attending the 40-hour MEET course. However, "due to cost and complexity, mission-essential equipment and trainer expertise are not commonly found at installations in the continental US," states the release. In fact, the regional training site in New London is one of only four sites in the country that provides this training, according to the release. 2013
