MOTTO

NICKNAME

OPERATIONS

The 22d Wing replaced an operational training unit at Hunter Field, Georgia on 5 Dec 1942 and began supervising and coordinating various aspects of dive bombardment training for subordinate groups. It moved to Florida in Feb 1943 and continued training until 15 Aug 1943. Reestablished in Jul 1959 and later redesignated 22d Strategic Aerospace Division, it assured that assigned units were organized, manned, trained, and equipped to conduct air refueling operations and long-range strategic bombardment using either nuclear or conventional weapons. In addition, from 1962 to 1965 the division controlled Atlas ICBM's.
