## COMMANDERS

Lt Col Arthur R. Marshall

## HONORS

**Service Streamers**

**Campaign Streamers**

**Armed Forces Expeditionary Streamers**

**Decorations**

## EMBLEM

## MOTTO

## **OPERATIONS**

The 6915th Electronic Security Squadron is located at Bad Aibling Station, West Germany, in the heart of Bavaria, 35 miles southeast of Munich. The 6915th is a tenant unit, as Bad Aibling Station is "owned" by the Department of Defense. All facets of life on station are joint service.

The mission is a challenging one with electronic equipment that is on the leading edge of technology. All work spaces are new or recently renovated and there are several new facility upgrades projected over the next years. In any workplace except the orderly room, a member's supervisor and coworkers could be Army, Navy, Air Force or civilian, making for a unique and interesting work environment.

The fourth site, 6915th ESS/Bad Aibling, tuned its overhead satellite receivers to new mission assignments and continued serving the U.S. cryptologic community.
